This editorial features articles from the third issue of the eighth volume of the Brazilian Journal of Planning and Development – Revista Brasileira de Planejamento e Desenvolvimento (RBPD). This issue has contributed to the planning and development, as in previous and usual numbers of this journal, by teachers from Brazil.

The first article by Morais, Zampier and Stefano (2019) addresses the issue of strategic planning in the Goioxim city hall. Then Martins and Franco (2019) talk about local development from photovoltaic power generation.

Then Razzolini Filho and Leinig (2019) talk about greenwashing. Then Paz, Moreno and Lamberti (2019) bring an article on human capital and employability. Kunen, Tabalipa and Sabbi (2019) then talk about multitemporal sensing.

The next article by Catapan et al. (2019) talks about energy efficiency in shopping malls. Following, Lima et al. (2019) address urban formation and real estate organization. Finally, Locatelli and Vicentin (2019) analyze municipal strategic planning from some perspectives.

We thank you for the contribution of all the authors and reviewers of our journal. Presented the articles of this issue, we wish a great and useful reading to all!
